22. COUNTRY OF ORIGIN -- SOURCE MATERIAL				23. COUNTRY OF ORIGIN -- SNM WHERE ENRICHED OR PRODUCED				24. COUNTRIES WHICH ATTACH SAFEGUARDS (If known)					
25. ADDITIONAL INFORMATION ON CONSIGNEES, END USES, AND PRODUCT DESCRIPTION (Use separate sheet if necessary)													
26. The applicant certifies that this application is prepared in conformity with Title 10, Code of Federal Regulations, and that all information in this application is correct to the best of his/her knowledge.													
27. AUTHORIZED OFFICIAL						a. SIGNATURE				b. TITLE			

**INSTRUCTIONS FOR PREPARATION OF APPLICATION FOR LICENSE TO EXPORT NUCLEAR
MATERIAL AND EQUIPMENT, NRC FORM 7**

One signed, original of NRC Form 7 must be submitted by the applicant to the Assistant Director for International Security, Exports and Material Safety, Office of Governmental and Public Affairs, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or delivered in person to the Commission's Offices at 11555 Rockville Pike, Rockville, Maryland. Except for the shaded areas, all applicable items on this form should be completed, to the extent the information is available at the time the application is submitted.

An applicant for an export license must make full disclosure of all recipients of the proposed export so that a decision on the application may be made with full knowledge of all relevant facts. The name(s) and address(es) of the plant, facility, firm, or location where the material may be handled, stored, converted, or fabricated and where the material ultimately will be used, together with precise facts concerning the use that will be made of the items to be exported by each intermediate and ultimate consignee must be stated. The materials or equipment to be exported must be fully and accurately described in detail. If more space is needed, attach an additional sheet of paper.

The following is excerpted from the Nuclear Regulatory Commission regulations prescribing procedures and standards for the export and import of nuclear equipment and nuclear material. For the complete codification of NRC's export and import regulations, applicants for licenses should refer to Part 110 of Title 10, Chapter 1, Code of Federal Regulations.

Subpart D -- Applications for Specific Licenses

§110.30 Filing license applications.

(a) A person shall file a license application with the Assistant Director for International Security, Office of Governmental and Public Affairs, U.S. Nuclear Regulatory Commission, Washington, DC 20555, or deliver the application in person to the Commission's Offices at 11555 Rockville Pike, Rockville, Maryland.

(b) An export license application should be filed on Form NRC 7 unless it is for a license to export a production or utilization facility. An export license application and a production or utilization facility export license application should be filed by letter. Upon request, applications may be filed by telegram.

(c) Each person shall provide in the license application, as appropriate, the information specified in §110.31. The Commission may also require the submission of additional information if necessary to complete its review.

(d) A consolidated license application may be filed covering multiple shipments.

(e) Information in a previous license application may be incorporated by reference.

(f) An applicant shall withdraw an application whenever it is no longer needed. The Commission's official files retain all documents related to a withdrawn application.

§110.31 Information required in license applications.

(a) Name and address of applicant.

(b) Name and address of supplier of equipment or material.

(c) Country of origin of equipment or material, if known.

(d) Names and addresses of all intermediate and ultimate consignees, other than intermediate consignees performing shipping services only.

(e) Dates of proposed first and last shipments.

(f) Description of the equipment or material including, as appropriate, the following:

(1) Maximum quantity of material in grams or kilograms (curies for byproduct material) and its chemical and physical form.

(2) For enriched uranium, the maximum weight percentage of enrichment and maximum weight of contained U-235.

(3) For nuclear equipment, total dollar value.

(4) For nuclear reactors, the name of the facility and its design power level.

(5) Description of end use by all consignees in sufficient detail to permit accurate evaluation of the justification for the proposed export or import, including the need for shipment by the dates specified.
